INFO3300 Project 1 Milestone 1

Idea 1: Create a chart representing the distribution of students at Cornell by major and college

Idea 2: Compare the distribution of songs that are streamed or sold in a year with that of the songs that win the Grammy's

Idea 3: Show gender distribution in engineering (either at Cornell or in the World): find relationships between gender distribution and engineering fields and majors. Compare this to gender distributions in other fields or majors.

Idea 4: Create a heatmap of the world corresponding to extreme weather changes in recent years, with arrows mapping international migration patterns.

Idea 5: Create a map showing US income distribution versus state population size

Idea 6: US population density compared to common health issues
